

GOBIHANATH BALASUBRAMANIAM

Data Scientist | AI/ML Engineer

 +94 771411559  gobihanath2601@gmail.com  Gobihanath Balasubramaniam  Gobihanath

Professional Summary

Motivated Data Scientist with a strong foundation in Data Science, Artificial Intelligence, and Machine Learning. Skilled in designing scalable AI solutions, implementing MLOps practices, and constructing end-to-end data infrastructure. Hands-on experience with cloud platforms to deploy and manage reliable, production-ready machine learning systems aligned with real-world business needs. Extensive involvement in academic and industrial research with a focus on practical applications of AI and Machine Learning.

Education

Bachelor of Science (Honours) in Computing and Information Systems

2021 – 2026

Sabaragamuwa University of Sri Lanka

Current GPA: 3.78 / 4.0

Major: Computer Science and Engineering

Relevant Coursework: Data Structures, Data Science, Software Development, Information Systems

Work Experience

Data Scientist – AI Solutions

Aug 2024 – Mar 2025

Dialog Axiata PLC

Internship

- Engineered and deployed end-to-end machine learning solutions supporting large-scale business operations, serving over 20 million users in telecom industry.
- Designed clean, maintainable Python codebases and implemented automated CI/CD pipelines to enable reliable model training, testing, and deployment.
- Built scalable data ingestion and transformation pipelines using Snowflake warehouses and Snowflake procedures, developed Snowflake dashboards for business reporting.
- Implemented full machine learning lifecycles including data exploration, feature engineering, model training, evaluation, optimization, and production deployment for 10+ ML projects.
- Developed and maintained cloud-native MLOps workflows leveraging AWS services including SageMaker, S3, CodeCommit, CloudWatch, SageMaker Studio, and SageMaker Pipelines.
- Completed the Analytics and AI Intern Certification Program with a final score of 96%.

AI / ML Engineer

May 2025 – Nov 2025

Zencord AI Solutions (PVT) LTD | Part-time

- Managed the end-to-end development of a RAG-based AI application, overseeing architecture design, implementation, and deployment.
- Trained and mentored interns on Python programming, machine learning concepts, and MLOps best practices.
- Conducted research and development on advanced AI and machine learning applications, exploring new techniques to enhance model performance, scalability, and real-world applicability.

Technical Skills

Programming Languages: Python, Java, JavaScript, C

Databases: MySQL, Microsoft SQL Server, PostgreSQL, MongoDB

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Plotly, NLTK, Scikit-learn, OpenCV, MLflow, Transformers, Keras, River, Google ADK, SciPy, tsfresh, PySpark PyCaret, SHAP, LIME

Frameworks: TensorFlow, PyTorch, LangChain, LangGraph, LlamaIndex, Flask, FastAPI, Streamlit

MLOps / Cloud: CI/CD, AWS (SageMaker, S3, Pipelines, CodeCommit), Snowflake, Apache Airflow, Apache Spark, Apache Kafka, Microsoft Fabric

Tools & Technologies: Git, GitHub, Docker, Power BI, SQL, Canva, Trello

Areas of Expertise

Machine Learning, Data Science, Data Analysis, Deep Learning, Online Machine Learning, Natural Language Processing, Large Language Models, MLOps, ETL Engineering, Business Intelligence, Software Engineering, Explainable AI

Projects

LLM Knowledge Distillation | *Python, PyTorch, Transformers, Ollama, NumPy, Scikit-learn*

Final Year Individual Research Project

- Focused on advancing Natural Language Processing (NLP) capabilities of compact (low-parameter) LLMs through task-specific knowledge distillation.
- Designed cost-effective and resource-optimized models, laying the foundation for intelligent AI agents and applications.
- Produced 8+ research publications, including contributions to industry-connected research tracks.
- Models used: LLaMA, Mistral, Falcon, Gemma, Qwen

Grownius – Agriculture RAG Agent | *Python, OpenAI, LangChain, ChromaDB*

- Led the development of a domain-specific RAG system for agriculture in Sri Lanka.
- Integrated supervised Machine Learning models for crop recommendation.
- Achieved 1st Runner-up – DreamSpace AI Hackathon 2025.

DTect – Signature Verification App | *Python, Tensorflow, OpenCV, Keras, CNN*

Capstone Project

- Developed a deep learning-based signature verification system using Convolutional Neural Networks (CNNs) and implemented it as an end-to-end mobile application.
- Served as Team Lead, overseeing the full ML development lifecycle, architecture design, and project implementation.
